

FORM 1**PRECOURSE SELF-ASSESSMENT AND GOAL SETTING**

After completing this page, make a copy and give it to your small group facilitator on August 1, 2016.

Your Name: _____

Undergraduate College: _____

Year of Graduation: _____ Major(s): _____

Post-bac studies: _____

- A. **Self Assessment:** Using the definitions below, indicate your current level of understanding (proficiency) for each of the 5 broad Medical Knowledge topics covered in MCBG (see Course Description) by placing an "X" in the appropriate box.

Definitions:

Novice - little or no exposure to terminology or content knowledge in this area;

Advanced Beginner - knowledge of terminology and basic concepts; can solve problems with help from source books; beginning to search for underlying reasons; uncertain when explaining basic concepts to others;

Competent - significant experience applying knowledge to solve common problems and analyze data without help from source books; requires consultation for complicated problems; generally able to explain basic concepts to others;

Proficient - able to apply knowledge to solve problems and analyze data in unfamiliar contexts; acts as consultant to others.

Level	Protein Structure & Function	Molecular Biology	Medical Genetics	Cell Biology
