Pediatrics Clerkship Overview

Dear Junior Medical Student,

I wish to take this opportunity to welcome you to the pediatrics clerkship and to explain the organization of our clerkship.

The hallmark of our clerkship is its student-centered nature and we try to tailor your experience to your areas of interest. In that spirit, much of the present structure and content of the clerkship is based on student feedback.

The “on call” experience has been modified to reflect the current residency duty hours. At Loyola, all students will be paired with an intern and work the hours that he/she does. Some students may be assigned to the night team. Weekend responsibilities are expected on your inpatient, ER and nursery rotations, whereas outpatient rotations have weekends off.

The Pediatric Clerkship does not accept Wild Cards for clinic assignments. Clinic assignments are based on each student’s lottery number. You are to complete the Ranking Form, which consists of tracks. Each track is a combination of inpatient, outpatient, and nursery experiences. You will rank the tracks based on your highest area of interest.

Rotations on track vary:

Outpatient

Inpatient

Nursery

Electives

- **Pediatric Emergency Room Rotation (night shifts)**
- **Pediatric Inpatient Rotation (night ward)**
- **Additional Outpatient Rotation**
- **Additional Inpatient Rotation (Day)**
- **Additional Nursery Rotation**
- **Pediatric Hem/Onc**
- **Pediatric Infectious Diseases**
- **Pediatric Cardiology**
- **Golisano Children’s Hospital of Southwest Florida**

Outpatient Sites:

We offer 2-3 week rotations at Loyola Primary Care sites as well as various community based in clinics in the area. See Preceptor List emailed to you.

Inpatient Sites:

Loyola Ronald Mc Donald Children’s Hospital (2-3 weeks)

The Loyola Ward experience offers exposure to children with a myriad of conditions ranging from acute to more chronic. You will be exposed to common illnesses as well as many oncology and other sub-specialty patients. Loyola has a very diverse patient population with regard to ethnicity, socioeconomic status, and case mix. This selection will expose you to a large number of ill patients and it will also have the greatest number of faculty and resident supervisors.

St. Alexius Medical Center (2-3 weeks)

St. Alexius is a very exciting site and a freestanding children’s hospital. It is not primarily a teaching institution but rather a community hospital located in Hoffman Estates. It is therefore particularly well suited to those who are motivated self-learners. You will encounter a variety of acute and chronic illnesses. Much of the time, you will not

be working with resident physicians but rather directly with the attending physicians working their daily shifts in the hospital. Your call schedule will be determined upon your arrival to the site after consulting with the hospitalists on staff. During your time in the newborn nursery, you will round on well newborns with the nurse practitioner and round in the neonatal intensive care unit with neonatologists.

La Rabida Children's Hospital (2 weeks)

La Rabida is a freestanding children's hospital located on Lake Michigan, just off Lake Shore Drive on the south side of Chicago. University of Chicago residents and medical students rotate at this location as well. It is a pediatric specialty hospital for extended acute care that caters to children with lifelong medical conditions. Services and programs include treatment for chronic illness such as sickle cell disease, developmental disabilities, and genetic disorders. You may encounter children who are dependent upon tracheostomies or ventilators. At this site, students will have ample opportunities to interact with ancillary staff such as physical therapists and occupational therapists. Students will attend educational sessions via teleconference from University of Chicago.

Nursery Sites:

Loyola Ronald Mc Donald Children's Hospital

You will round on healthy babies daily and attend high-risk deliveries. You will have the opportunity to work with Pediatric Residents and receive both formal and informal didactic teaching sessions. You will round on Saturday or Sunday.

St. Alexius Medical Center

Similar to Loyola Nursery, you will also round on healthy babies and attend high-risk deliveries. There are no residents at SAMC so you will work mainly with the newborn nurse practitioner and neonatologists. No weekend responsibilities.

Electives (1 week):

Loyola Emergency Department

Students will have the opportunity to see patients in the pediatric emergency room. You will encounter many acute illnesses and injuries. You may have the opportunity to practice hands on skills and care for a higher level of acuity. The shifts will be 10pm-6am.

Pediatric Inpatient (night ward)

You will arrive at 6pm and obtain sign out from the day team. You are expected to take new admissions and present to the intern and senior resident. You can also help reassess patients from the daytime team as needed. The shifts will be from 6pm-12midnight.

Additional Outpatient

This elective is intended for students interested in primary care who would like to have longer exposure to outpatient medicine.

Additional Inpatient

This elective is intended for students interested in more in depth patient monitoring who would like to have longer exposure to inpatient medicine.

Pediatric Hem/Onc

Emphasis will be given to the discussion and understanding of basic hematologic problems such as anemias, white blood cell dysfunction, coagulation disorders and the understanding of the pathophysiology of the hemostatic system. The oncology area will include the study and management (patient care) of the most common pediatric malignancies with special emphasis on leukemias. Students will be expected to attend clinics and participate in the care and management of the patients together with the attending and resident staff.

Pediatric Infectious Diseases

The student will see pediatric patients needing infectious disease consultation and will write the initial and daily notes. He/she will attend all scheduled lectures and activities of the Department of Pediatrics. The student will receive some instruction in microbiology from the clinical microbiology laboratory. The student will attend weekly pediatric infectious disease clinic.

Pediatric Cardiology

The student will see all pediatric patients with dysrhythmias, congenital/acquired heart disease. Their ages range from newborns to adulthood. Patients are seen/consulted in the newborn nursery, neonatal intensive care units, the pediatric intensive care units, and pediatric floor. Students are expected to participate in daily rounds. The student will all also attend outpatient Cardiology clinics.

Lee Health System – Fort Myers, FL

The Golisano Children's Hospital of Southwest Florida - a standalone, state-of-the-art facility that opened in 2017. The children's hospital is a standalone 300,000-square-foot, 7-story facility. It now provides a variety of specialized services – from emergency care to behavioral health, surgery to critical care, orthopedics, cancer treatment, cardiology, pediatric neurosurgery, and more.

Two students will be selected to rotate for the duration of the 6-week Pediatric clerkship at Golisano Children's Hospital of Southwest Florida in Fort Myers, Florida. Students will rotate through inpatient, outpatient, newborn nursery, and ER clinical sites. Additional information and expectations will be provided separately. **Please notify Clerkship Director and coordinator if you ARE INTERESTED in rotating here AND rank the Florida tracks as your first/second choice. If there is a reason you CANNOT rotate in Fort Myers, please notify Clerkship Director and coordinator as well by making a note in the comment section of the lottery form.**

These sites have been structured to accentuate the positive things that students have previously commented on and to eliminate the problems that previous students have noted. As you may have heard, our clerkship has been very popular among students, and we have a higher rate of students choosing pediatrics as a career compared to the national average. We hope to continue this trend and look forward to more of your feedback on the clerkship in order to improve it further.

Should you have any questions regarding the rotations, please do not hesitate to contact me at rshahid@lumc.edu. Good luck!

Sincerely,

Ramzan Shahid, MD
Pediatric Clerkship Director

PEDS Clerkship Objectives

Pediatrics Objectives and Links

[Link](#)

Medical Knowledge

1. Describe the principal underlying causes, mechanisms and processes involved in the etiology of pediatric and adolescent illnesses, including: Prevention & Screening Visits – Infant (<1yr), Toddler (1-2yrs), Pre-school (3-4yrs), School Age (5-12), Adolescent (13-18), Pediatric Central Nervous System Complaint, Pediatric Fever Without Source, Pediatric GI Tract Complaint, Pediatric Growth, Pediatric Heart Murmur, Pediatric Jaundice, Pediatric Lower Respiratory Complaint, Pediatric Musculoskeletal Complaint, Pediatric Rash, Pediatric Upper Respiratory Tract Complaint, Pediatric Well Newborn Nursery, Obesity, Eye Disorder, Pediatric Chronic Medical Problem – Asthma, Allergic Disorder 1.2
2. Describe management and treatment options (pharmacological and non-pharmacological) for common pediatric and adolescent illnesses 1.3
3. Explain the developmental milestones that occur through infancy, childhood and adolescence 1.4
4. Demonstrate an understanding of economic, psychological, social and cultural factors that impact patient health 1.5
5. Explain the principles of preventative medicine, including vaccine schedules, cancer screening, counseling for risk prevention, maintenance of healthy lifestyle and obesity prevention 1.6
6. Demonstrate an understanding of study design and basic testing characteristics to incorporate evidence based medicine into practice 1.7

Patient Care

1. Elicit a complete and focused history and physical examinations of patients, including: pediatric ear examination and newborn examination 2.1
2. Interpret common screening and diagnostic tests, including neonatal screening panels, complete blood count abnormalities and urinalysis 2.1
3. Apply clinical reasoning skills in developing a prioritized differential diagnosis 2.2
4. Construct appropriate management strategies for patients 2.3
5. Counsel patients and parents on utilizing health maintenance guidelines to educate on risk factors for diseases 2.5
6. Demonstrate ability to understand and utilize health maintenance guidelines to identify risk factors for disease in patients 2.6
7. Utilize the health record to assist in care of patients, including chart review, documentation and request of medical records 2.7

Interpersonal and Communication Skills

1. Record in the electronic medical record and present a complete history and physical examination 3.1/3.4
2. Discuss with the patient and parents the findings of the clinical investigation and plans for follow up 3.2
3. Demonstrate an understanding of how cultural beliefs and spirituality can affect healthcare outcomes, including obtaining a cultural history when appropriate 3.2
4. Demonstrate an understanding of and participate in transitions of care 3.3/6.3
5. Demonstrate the ability to deal with difficult clinical situations 3.5
6. Use effective communication skills and styles when working with other members of the healthcare team 3.3

Practice Based Learning and Improvement

1. Recognize and accept one's own limitations in knowledge and clinical skills 4.1
2. Critically evaluate one's performance to identify strengths and personal limitations in clinical knowledge or study methods, and develop learning goals to address limitations 4.1/4.2
3. Actively seek out timely and formative feedback 4.3
4. Collaborate with peers, other healthcare professionals, patients and families in order to integrate feedback to positively modify clinical behavior 4.3
5. Demonstrate the ability to effectively read, research and critically review the scientific evidence relevant to the care of patients and clinical issues 4.4/4.5
6. Utilize information technology to access and manage clinical information and perform online searches to support self-directed learning 4.5
7. Perform efficient literature searches and apply the results of medical research to clinical practice 4.5

Professionalism

1. Demonstrate professionalism by behaving in a professional, courteous and respectful manner when engaged with peers, faculty, residents and non-physician staff 5.1
2. Demonstrate behaviors that foster patients' trust in the physician, including: appropriate dress, appropriate grooming, compassion, reliability, honesty, and respect for privacy 5.1
3. Demonstrate professional behavior by completing all clerkship requirements, including clerkship evaluations, in a timely manner 5.2
4. Demonstrate responsibility and accountability by attending and being punctual at all required clerkship activities, including lectures, small groups, morning report and clinical rounds 5.2
5. Demonstrate professional behavior by requesting any excused absence from required clerkship activities in the required time frame 5.2
6. Demonstrate professional behavior by responding to direct communication from the Clerkship Director or Coordinator in a timely fashion, particularly in circumstances related to academic performance 5.2
7. Demonstrate advocacy for patients over personal interests 5.3

- | | |
|---|---------|
| 8. Demonstrate respect for patient privacy, and sensitivity to patients with diverse backgrounds | 5.3/5.4 |
| 9. Demonstrate professional and ethical behavior by honestly completing clerkship examinations without attempting to seek advantage by unfair means, and by reporting unethical behavior of peers to clerkship administration | 5.6 |

Systems Based Practice

- | | |
|---|---------|
| 1. Identify considerations of cost awareness for patient care. | 6.1 |
| 2. Demonstrate an understanding of the impact of economic and health insurance issues on patient care | 6.1 |
| 3. Collaborate with health care professionals to assess, coordinate and improve health care delivery, to promote health, prevent disease and manage illness | 6.2 |
| 4. Utilize strategies to access health care services for patients who need advocacy and assistance | 6.2/6.4 |
| 5. Analyze and identify system errors and potential solutions | 6.3 |
| 6. Identify ways to advocate for quality patient care and optimal patient care systems | 6.4 |
| 7. Identify individuals at risk for inadequate healthcare, including the uninsured, elderly, physically and mentally disabled | 6.4 |
| 8. Demonstrate commitment to and examples of service to patients in need | 6.4 |

Inter-professional Collaboration

- | | |
|---|---------|
| 1. Work collaboratively with members of the healthcare team to optimize delivery of care to the patient | 7.1/7.3 |
| 2. Respectfully and effectively communicate issues of patient care with non-physician healthcare workers | 7.1/7.3 |
| 3. Organize the appropriate use of consultants and referrals | 7.1/7.3 |
| 4. Explain the role of transitional care agencies and developmental specialists in care of pediatric patients | 7.1/7.3 |
| 5. Demonstrate an understanding of the roles of other members of the healthcare team | 7.2 |

Personal and Professional Development

- | | |
|--|-----|
| 1. Demonstrate a personal responsibility to maintaining one's own physical and mental well-being | 8.1 |
| 2. Demonstrate an ongoing commitment to pursuing learning opportunities for personal and professional growth and development | |

COMSEP
Appendix A
Clinical Domain Objectives
Core and Supplemental

Care of the Acutely Ill child

Fluid and Electrolyte Management

1. CORE
 - a. Calculate intravenous or oral maintenance fluids for a child, considering daily water and electrolyte requirements.
 - b. Assist in the writing of IV fluid orders for a child requiring acute fluid resuscitation.
2. Supplemental
 - a. Describe the causes and consequences of fluid imbalances and electrolyte disturbances leading to dehydration and such conditions as hypernatremia, hyponatremia, hyperkalemia, hypokalemia, severe acidosis, and alkalosis.
 - b. Describe the additional fluid and nutritional needs or restrictions in children with emergent conditions

Therapeutics

1. CORE
 - a. Describe the appropriate use of medications for common pediatric conditions (see Common Illnesses table).
2. Supplemental
 - a. Describe and practice the principles of antibiotic stewardship.
 - b. Describe the ways medication errors are systematically prevented.

Common Acute illness in Children

1. CORE
 - a. Obtain a history pertinent to the presenting concerns
 - b. Perform a physical examination and interpret pertinent findings (Common Physical Exam Findings)
 - c. Interpret common laboratory tests (Common laboratory findings)
 - d. Generate an age-appropriate differential diagnosis

 - e. Describe an initial diagnostic and therapeutic plan for children with common pediatric concerns (see Common Illnesses table)

Pediatric Emergencies

1. CORE

- a. Describe the clinical manifestations and initial management of emergent pediatric conditions such as:
 - i. sepsis
 - ii. shock
 - iii. respiratory distress/failure
 - iv. altered mental status
 - v. status epilepticus
 - vi. acute abdomen
 - vii. Trauma
- b. Discuss presentations concerning for child maltreatment, and the physician's role in reporting to Child Welfare.

2. Supplemental

- a. Describe the presentation and management of accidental and intentional ingestions
- b. Describe the role of the physician in the interdisciplinary evaluation of children who may be maltreated.

Newborn Care

1. CORE

- a. List the differential diagnosis and identify the clinical and laboratory features of an acutely ill infant for common problems that may occur (see common illnesses table).
- b. Propose the evaluation and management of the acutely ill infant with conditions such as:
 - i. jaundice
 - ii. respiratory distress
 - iii. concern for serious bacterial infection (sepsis, meningitis, bacteremia, UTI)
 - iv. shock
 - v. poor feeding

2. Supplemental

- a. Assess gestational age using standardized tools
- b. Discuss some of the clinical conditions and challenges associated with prematurity

Care of Chronically Ill Children

Growth and Nutrition

1. CORE
 - a. Obtain a dietary history in children of different ages with chronic conditions, including type of feeding, amount, frequency, restrictions, and supplements.
2. Supplemental
 - a. Counsel children and families regarding appropriate nutrition, including caloric intake, assessment of dietary restrictions, introduction of solid food, and obesity prevention, along the developmental spectrum.

Therapeutics

1. CORE
 - a. Demonstrate the appropriate use of medications for common chronic pediatric conditions (see Common Illness table).
2. Supplemental
 - a. Practice principles of antibiotic stewardship.
 - b. Describe the ways medication errors are systemically prevented.

Common Chronic Illnesses

1. CORE
 - a. Describe the clinical features associated with common pediatric chronic medical conditions (see chronic illness table).
 - b. Describe how chronic illness can influence a child's growth and development, educational achievement, and psychosocial functioning.
 - c. Identify basic management strategies for common chronic illnesses seen in children (see Common Illness table)
 - d. Describe the role of the multidisciplinary team in the care of children with chronic illnesses
2. Supplemental
 - a. Attend an interdisciplinary family meetings regarding the care of a child with chronic conditions
 - b. Describe the importance of transitions of care and care coordination for children with chronic conditions

Care of the Well Child

Growth and Nutrition

1. CORE
 - a. Obtain a dietary history in children of different ages including amount, frequency, restrictions, and supplements.
 - i. Infants: type, amount and frequency of breast or formula feeding, solid foods, and dietary supplements (vitamins, iron)
 - ii. Toddler/school age: well-balanced diet, milk, juice, soda, fast foods, meal patterns, dietary supplements (MVI, fluoride)
 - iii. Adolescents: well-balanced diet, meal patterns, nutritional supplementations, milk, juice, soda, snacking, fad diets, eating disorders
 - b. Identify abnormal growth patterns on standard growth charts
2. Supplemental
 - a. Counsel children and families regarding appropriate nutrition, including caloric intake, assessment of dietary restrictions, introduction of solid food, and obesity prevention, along the developmental spectrum.
 - b. Develop an initial evaluation and management plan for the child with an abnormal growth pattern

Development

1. CORE
 - a. Describe the major developmental domains (e.g. gross motor, fine motor, language, and social development) and how development is routinely assessed.
 - b. Recognize developmental delays based on history, physical exam, and results of screening tools
2. Supplemental
 - a. Describe the initial evaluation of children with developmental concerns.

Behavior

1. CORE
 - a. Describe the range of typical behavior across the developmental spectrum.
 - b. Recognize the clinical manifestations of common pediatric behavioral and developmental conditions including anxiety, depression, ADHD, autism, and concerns for self-harm Supplemental
 - c. Provide developmentally appropriate counseling regarding the management of common parental concerns such as discipline, toilet training, and daily routines.
 - d. Provide initial management suggestions for children with common pediatric mental health conditions including anxiety, depression, and concerns for self-harm.

Adolescence

1. CORE

- a. Interview an adolescent patient using a standard structured interview technique to address sensitive issues that affect health and safety.
- b. Describe the unique features of the physician-patient relationship during adolescence

2. Supplemental

- a. Counsel adolescents regarding high risk behaviors, sexual activity/orientation, violence, eating disorders, substance use, and bullying.

Prevention

1. CORE

- a. Describe the rationale behind the pediatric immunization guidelines and the vaccine preventable diseases they aim to prevent.
- b. Describe age-appropriate anticipatory guidance for injury prevention across the developmental spectrum.
- c. Recognize the use of screening tools in the assessment of growth, development, behavior, social determinants of health, and family violence.

2. Supplemental

- a. Be able to identify resources for catch-up immunization schedules in under-immunized children.
- b. Recognize the scenarios in which certain immunizations may be contraindicated (e.g. livevirus vaccines in immunocompromised)

Newborn

1. CORE

- a. Describe the common concerns to be reviewed during well newborn visits, including newborn feeding, sleep, safety, and parental self-care
- b. Obtain a dietary history for a newborn/infant- including type of feeds, amount and frequency of breast or formula feeding, solid foods, and dietary supplements (vitamins, iron).
- c. Describe the advantages of breastfeeding and describe common difficulties experienced by breastfeeding mothers.

2. Supplemental

- a. Discuss ongoing health maintenance strategies for former premature infants
- b. Describe the initial counseling of parents with common newborn concerns such as colic, feeding, stooling patterns, etc.

Required Clinical Conditions

Listed below are the Required Clinical Conditions, complete by the end of your clerkship. It can be completed either by a personal patient encounter or by completing the alternate resource given below. There should be no zeros as each clinical condition has an alternative if not completed by patient encounter.

Required Clinical Conditions	Clerkship	Alternate Resource
Pediatric Central Nervous System Complaint (HA, Sz, closed head injury)	Pediatrics	Aquifer Clipp Case 19
Pediatric Chronic Medical Problems- Asthma	Pediatrics	Aquifer Clipp Case 13
Pediatric Chronic Medical Problem - allergic disorder	Pediatrics	Aquifer Clipp Case 13
Pediatric Chronic Medical Problems - obesity	Pediatrics	Aquifer Clipp Case 4
Eye Disorder	Pediatrics	Aquifer Clipp Case 31
Pediatric Fever	Pediatrics	Aquifer Clipp Case 11
Pediatric GI Tract complaints (nausea, vomiting, diarrhea, abd pain)	Pediatrics	Aquifer Clipp Case 16
Pediatric Growth/Nutrition Concern	Pediatrics	Aquifer Clipp Case 28
Pediatric Murmur	Pediatrics	Aquifer Clipp Case 18
Pediatric - Jaundice	Pediatrics	Aquifer Clipp Case 8
Pediatric Lower Respiratory Tract Complaint (cough, wheeze, SOB)	Pediatrics	Aquifer Clipp Case 13
Pediatric Musculoskeletal Complaint	Pediatrics	Aquifer Clipp Case 17
Pediatric Rash	Pediatrics	Aquifer Clipp Case 32
Pediatric Upper Respiratory Tract Complaint (sore throat, otalgia, rhinorrhea)P	Pediatrics	Aquifer Clipp case 13
Pediatric - Well Newborn (nursery or outpatient)	Pediatrics	Aquifer Clipp case 1
Prevention and Screening Visit: Infant (<1year)	Pediatrics	Aquifer Clipp case 2
Prevention and Screening Visit: Toddler (1-2 years)	Pediatrics	Aquifer Clipp Case 28
Prevention and Screening Visit: Preschooler (3-4 years)	Pediatrics	Aquifer Clipp Case 3
Prevention and Screening Visit: School Aged (5-12 years)	Pediatrics	Aquifer Clipp Case 4
Prevention and Screening Visit: Adolescent (13-18 years)	Pediatrics	Aquifer Clipp Case 5

Peds Direct Observation Requirement

Direct observation refers to the times when instructors, either faculty or resident physicians, observe you take key parts of the history or exam at the bedside.

Direct Observation of key components of taking a history and performing the physical examination is an important educational opportunity to receive individualized formative feedback and to continue to grow in these skills toward expertise.

During each core clerkship, you will be required to have a faculty physician or a resident:

1. Observe you take a key portion of one history.
2. Observe you perform a part of the physical examination. Each clerkship oversees a particular part of the exam and requires one or multiple observations as determined by the clerkship directors.

Clerkship Examination Number of Observations Required: 3 Pediatrics

Note that in some instances that a “key” portion the exam may involve something other than that listed above. An example-- A patient is admitted for peripheral vascular disease. A faculty member observes your exam and coaches you on the best techniques for examining for a AAA or femoral pulses. That certainly would count towards being directly observed on that rotation.

After each observation, be sure to enter the Direct Observation tracking system through MyLumen. Follow the prompts. An email will automatically be generated to the physician who observed you for verification.

Note that failure to complete this requirement or enter the data in the system will result in a grade of “U” for the clerkship until the requirement is fulfilled and the data entered. The deficiency may also be considered in the evaluation of your professionalism competency.

Please take full advantage of this opportunity to learn and improve your skills as you work with patients. Be intentional and deliberate in seeking out the tips your teachers may be able to offer.

Opportunities will vary on each clerkship, of course. Let the clerkship coordinator know if you encounter any difficulties or have any questions. This educational activity has been going well for many years, but if you notice significant ongoing resistance to obtaining these direct observations/coaching experiences on a particular rotation, do make us aware of it.

Peds Direct Observation Requirement

Requirements for Direct Observation: On each clerkship, each student shall be directly observed taking key components of the history at least once. On each clerkship, a student shall be directly observed performing key physical exam steps. The steps to be observed will vary by clerkship, as will the number of examinations to be observed (both determined by the Clerkship Directors). See below:

Clerkship	Histories Required	Examinations Required	Examination	Components of Examination
Pediatrics	1	3	ENT	Describe position, color, opacity, mobility of the tympanic membrane Ear exam overall Insufflation technique of tympanic membrane Use of cellscope optional

Teaching Conferences

- Pediatric Weekly Schedule (for Loyola-based students and nearby outpatient students)
 - Morning Report (8A) – M, W, F
 - Grand Rounds (8A) – Tuesdays
 - Usually no MR on Thursday (but do have during recruitment season)
 - Thursday conference from 11-1p (or Mondays during recruitment season) for Loyola campus based students
 - Check schedule - some are for residents only
- Loyola campus IP, OP, NBN 8am lectures in person
- Night float – students to not need to attend Morning Report or Grand Rounds
- St. Alexius and La Rabida have their conferences. Students do not attend Loyola residency conferences/Grand Rounds during their clinical weeks at St. Alexius or La Rabida

Grading Policy

- Subjective Evaluations 36%
 - Each week 6%
- OSCE 14%
- Quizzes (1% each) 3%
- Practice Exam 2%
- Clerkship Assignments 5%
 - Graded H&P x 2 (2%)
 - EBM CAT Form (1%)
 - Nursery checklist, mommy rounds, Operation Homefront reflection (1%)
 - 32 required CLIPP cases (1%)
- Final online exam 40%
 - Passing exam score is 62%
 - Scores 62% to 65% will receive a “meets with concerns” under Medical Knowledge competency
 - Scores less than 62% will result in a “does not meet expectation” under Medical Knowledge competency
 -

Final Grade

- Each cohort is curved 30%/40%/30% for Honors/High Pass/Pass
- Pass the Clerkship Overall: 69.9%
- Must pass clinical (60%), NBME exam (62%) and OSCE (60%)
 - Remediation offered as needed

Evaluations

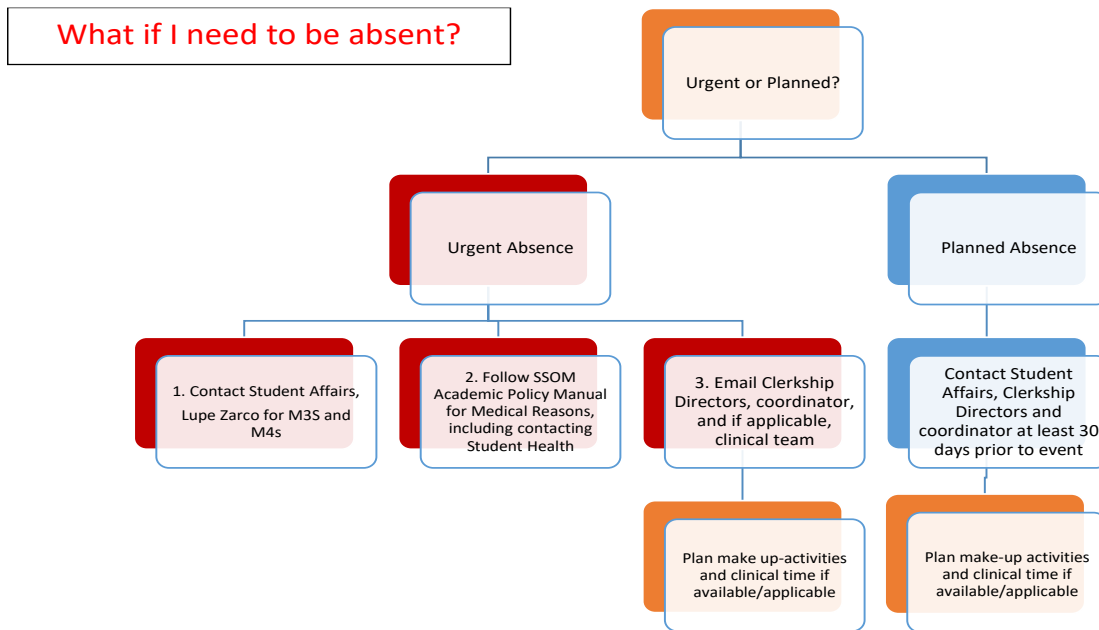

Students are responsible for requesting evaluations forms from preceptors. All evaluations are completed by faculty/residents online. No paper evaluations will be accepted. Attendings/Residents are sent instructions on how to complete student online evaluations. You may request evaluations from attendings/residents you work with through MyLumen by logging on mylumen. Click on **Clinical Performance Review**, request evaluation link. If you do not see the resident/attending on the drop down list, let me know and I will add them. Only Loyola PEDIATRIC attendings/residents are allowed to evaluate you; you are not to be evaluated by rotating or outside residents, with the exception of students assigned to NON-Loyola Clinics.

- Preceptors have up to 3 weeks after the clerkship ends to submit evaluations.
- Grades are finalized to the Registrar’s Office no later than 4 weeks after the end of clerkship.
 - At the end of the year, director analyzes all data and your grade may change
 - Only could go up, NEVER down 😊
- Scoring System
 - 1 = 50%
 - 2 = 62.5%
 - 3 = 75%
 - 4 = 87.5%
 - 5 = 100%

Absences

Sick Policy

- Contact Student Wellness at by calling Dial-a-Nurse at 773-508-8883 to set up an appointment; or your private physician immediately to set up an appointment to be excused. You need to provide documentation that you are ill. A follow up appointment is needed in Student Wellness to document clearance to return to work.
 - Alert your site that you are ill. Be sure to let your preceptor/team know as well.
 - Student Wellness at HSC contact information:
<https://www.luc.edu/wellness/aboutus/contactus/>
- Send an E-mail to Dr. Ramzan Shahid and copy Dean Mendez, Lupe Zarco, and Natalie Hiller, letting us know you are ill.
- All Documentation should be emailed to:
 Natalie Hiller, Clerkship Coordinator
 nhiller@luc.edu
 SSOM, Room 300

Lupe Zarco (Assistant Director of Student Affairs, MS3 and MS4) gzarco@luc.edu	Natalie Hiller (Clerkship Coordinator) nhiller@luc.edu
Dr. Ramzan Shahid (Pediatrics Clerkship Director) rshahid@lumc.edu	Dr. Nadia Qureshi (Pediatrics Assistant Clerkship Director) nqureshi@lumc.edu

TIME OFF REQUESTS

As a reminder of school policy re: non-emergent absences, ALL time-off and special accommodation requests must be submitted in writing to the clerkship director, Dr. Ramzan Shahid @ rshahid@lumc.edu. Please cc Dean Mendez and Natalie Hiller in the email. Requests must be turned in at least 30 days prior to the start of the rotation. Approved days off are intended to be for major life events or related academic concerns. A request for days off does not guarantee approval and notification of approval will be given via schedule release. Please note that some portions of the clerkship involve weekend duties, so weekends are not automatically free.

Rotation Information

Loyola Outpatient Sites: Contact main preceptor on Preceptor List, prior to your start date to ask at what time to report to clinic. You may send them a message through EPIC by searching for attending and clinic. If you are unable to find through EPIC, you may use Loyola Portal directory. Request your evaluation through mylumen from the preceptor you worked with or ask your preceptor who to send your evaluation at the end of your rotation.

Loyola Inpatient Rotation: 2 H&P forms are required (please refer to the Student-To-Do-List, which states all requirements for each rotation). Request your evaluation through mylumen from the preceptor you worked with or ask your preceptor who to send your evaluation to at the end of your rotation.

Peds Inpatient located in the Main Hospital 4th floor.

- Assigned to one of the two teams
- Arrive for sign-out at 6am
- Pre-round 6am to 8am
- 8a Morning Report or Grand Rounds
- M – F rounds with attending at 9a
- Hem/onc rounds 1p
- Sign out at 6p
 - 1 student from each team may be able to leave early (discretion of senior resident)
- Case presentation at morning report
- Topic presentation(s) on rounds
- Weekends: You must work 1 weekend day each weekend
 - 6am to 2pm (Unless SSOM holiday or after exam)

Loyola Night Ward Schedule (1-week rotation): You will be paired with the pediatric night intern; there is only one resident every night. At the end of your day, sign into mylumen and request an evaluation from the resident you worked with. If you work with the same resident for the entire time on night ward, then just one evaluation is needed. Request evaluations on mylumen, under the Clinical Performance Review tab.

Loyola Wards is located in the Main Hospital 4th Floor.

- Same expectations as ward
- Shift is from 6pm – 12midnight
- Arrive at 6pm for sign out from day team
- Take new admissions and present to your senior resident and intern
- Thursday night work 6p – midnight so you may attend required Friday teaching sessions at 1pm
 - *Evaluation completed by senior resident and/or intern with input from attending

Loyola Nursery: Newborn Nursery Mother Rounds Form and NBPE Form required (refer to the Student-to-do-List, which states all requirements for reach rotation). Request your evaluation through mylumen from the preceptor you worked with or ask your preceptor who to send your evaluation to at the end of your rotation.

Newborn Nursery, 2nd Floor Main hospital, next to L&D

http://stritch.luc.edu/lumen/restricted/calendar_restricted/Peds/Lectures/NBN_Orientation_2019.pdf

- Neonatology exposure
 - Didactics by neonatologists and/or senior residents around 2pm M-Thursday
- 1 student should stay late daily with intern
- Round one weekend morning – divide among the team.
- Arrive by 6am for sign out on weekdays
 - Weekend timing varies based on attending schedule
 - You must round on 1 weekend day (Unless SSOM holiday or after exam)

Loyola ER Instructions: See ER Instruction document for specific instructions.

http://stritch.luc.edu/lumen/restricted/calendar_restricted/Peds/Peds_EM_Instructions3.pdf

- 10p-6a in Loyola Peds ER (5-6 shifts)
- OFF night before PCM
- **Work with and Present patient to Senior Peds Resident – Student does NOT present to faculty**
- Write H&P on all your patients.
- Wear full scrubs or business casual attire
 - Please no hoodies or fleece
- Assess patients and present to the senior resident
 - Present patient to attending ER doctor together
- Complete 1 eval for each night you work by senior peds resident
 - If you work with 1 resident for multiple nights he or she may fill out 1 form if desired
 - Indicated # nights on evaluation
 - Evals will be weighted and averaged to create your grade

La Rabida Ward Information: La Rabida Children’s Hospital
6501 South Promontory Drive (East 65th Street @ Lake Michigan)
Chicago, IL 60649
Phone: 773-256-5733
Main Contact: Dr. Sarah Hoehn

On your first day at La Rabida:

- Arrive at La Rabida at 8:00am front desk lobby: ask for Lynne Cunningham.
- Obtain ID badge. Mark Calendar on your cell phone to return ID badges last date of rotation.
- Join morning rounds on the units (meet with inpatient resident physicians in Chart room 2North ext. 5959 (2 IP units 2 North and South)

At this point the resident physicians can assist medical students to navigate or find information in meditech EMR system. If there are any further questions inpatient medical students are welcome to reach Nishat at Ext 4410 between the hours of 8:00AM to 4:30PM. Or can reach via the vocera device by dialing internal via ext 2585.

IT helpdesk: Ext 4295 for windows log in assistance if the password is not working or need a meditech Pin number rest. OR mail: helpdesk@larabida.org

La Rabida Medical Student Objectives:

1. Perform a complete history and physical exam of a child with medical complexity

2. Be familiar with medical devices commonly used for children with medical complexity (tracheostomy, home ventilators, feeding tubes)
3. Develop a differential diagnosis of acute illnesses in the child with medical complexity and participate in management of conditions such as aspiration pneumonia, line infection, decubitus ulcers, feeding intolerance, seizures, and others.
4. Participate in the assessment and management of health maintenance tasks for children of medical complexity, including vaccinations, hearing and vision screens, and routine subspecialty follow-up.
5. Communicate effectively with specialty providers to coordinate care of patients
6. Participate in meetings with families regarding goals of care and discharge planning.
7. Recognize local community and educational resources for children with medical complexity.
8. Utilize shared decision making with patients and family/caregivers, including those regarding goals of care and quality of life

St. Alexis Information: <http://stritch.luc.edu/lumen/MedEd/peds/homepage/St.%20Alexius.htm>

2 H&P forms are required (please refer to the Student-To-Do-List, which states all requirements for each rotation).

<p>Nursery - Request your evaluation for through mylumen from Anne Drahos</p> <ul style="list-style-type: none"> • Arrive at 7 to pre-round • Nursery rounds: 8-10 • NICU rounds: 10-12 • Attend deliveries with NP and neonatal teams • Lectures in afternoons • NO WEEKENDS! Our gift to you for making the drive 😊 	<p>Inpatient - Request your evaluation through mylumen from Dr. Stephen Pichler. He will gather feedback from all other attendings and submit team evaluation</p> <ul style="list-style-type: none"> • Arrive to pre-round by 7 (or earlier if you need more time). Rounds usually start at 9 • Weekends: You must round on 1 weekend day each weekend <ul style="list-style-type: none"> ○ Unless SSOM holiday or after exam
--	--

Pediatrics Clerkship Student To-Do-List

Evaluations: All evaluations are completed by faculty/residents online. No paper evaluations will be accepted. Attendings/Residents are sent instructions on how to complete student online evaluations. You may request evaluations from attendings/residents you work with through MyLumen by logging on mylumen. Click on “Clinical Performance Review”, request evaluation link. If you do not see the resident/attending on the drop down list, let me know and I will add them. Only Loyola PEDIATRIC attendings/residents are allowed to evaluate you; you are not to be evaluated by rotating or outside residents, with the exception of students assigned to NON-Loyola Clinics.

All required documents must be turned in Submit on Sakai, access using your Loyola Credentials. <https://sakai.luc.edu/>.

Outpatient Rotation

- Evaluation – request via mylumen
- Patient Log online updated at the end of rotation

Inpatient Rotation

- Evaluation – request via mylumen
- Patient Log online updated at the end of rotation
- H&P #2 Evaluation Form Completed and Signed - Submit on Sakai, access using your Loyola Credentials. <https://sakai.luc.edu/>.
